

Taking care of your wheels and Tyres

Ozzy Tyres knows that Tyre maintenance is one of the **simplest yet most neglected aspects when taking care of a vehicle.**

Please take a few minutes to read this brief manual.

Please note Maintenance encourages safety by taking care of your Tyres.

Benefits:

- Better Fuel Consumption
- Tyres will wear evenly, giving you extra mileage before replacement.
- Tyres will perform at the optimum rate for performance and safety.

Helpful Tips for tyres

- Always inflate tyres to the recommended pressure, please check owner's manual for confirmation.
- Tyre pressure needs to be checked monthly as cold and hot weather typically hardens the tyre while the heat expands and tyres reduce tyre pressure.
- Never drive a under inflated tyres is certain to cause extended damage and increase fuel consumption.
- Tyre Rotation is imperative and always proven to extend the tread life. During the rotation it helps to look at the direction of the wear, as it can determine whether your suspension needs replacing.
- Please remove any material stuck in the groove to prevent extended damage
- Avoid excessive pressure as this will reduce the life of the tyre.
- **Ozzy Tyres offers free tyre inspection while you wait.** Our flat fee service offering is inclusive is tyre rotation, wheel alignment, balancing and making sure you're getting the most out of your tyres.

- Its best practice to get a wheel alignment either every 10,000 kilometers or every six months whichever comes first.

Helpful Tips for wheels

- To avoid corrosion from brake dust and other harmful chemicals always **use hot soapy water**; however make sure that your vehicle is placed in a cool area to avoid heat dissipation.
- If you decide to use automotive detergents, check to make sure that it does not cause metal decay.
- Remember to apply wax or sealant on your wheels after cleaning them. This makes it easier to clean or polish the wheels next time.
